Python Web Scrapping Assignment

Problem Statement:

You work in XYZ Corporation as a Python developer. The corporation wants you to build a system that can predict the salary of an employee based on the experience of the employee in number of years.

Tasks to beperformed:

1. . Given an html file containing blog posts
   - Parse the file using BeautifulSoup
   - Extract the Title, Summary and Link of all the posts
   - Save all this data in a csv file named 'scraped_data.csv'
